Location Islamabad, Pakistan

PROFESSIONAL SUMMARY

Software QA Engineer with 2+ years of experience delivering end-to-end quality assurance across web, mobile, and blockchain platforms. Proven track record of independently owning the full STLC, from test planning and execution to defect management and release sign-off, across 8+ live products in the Web3, DeFi, and AI sectors. Experienced in API testing, performance testing, and cross-platform validation, with a dual background in project management that enables close collaboration with developers, designers, and stakeholders to ship secure, high-quality software on schedule.

CORE SKILLS

QA Methodologies STLC · SDLC · Agile/Scrum · Test Planning · Test Case Design · Bug Reporting
Testing Types Functional · Regression · Smoke/Sanity · Performance/Load · UI/UX · API · Security
Testing Tools Postman · TestRail · Jira · Trello · Asana · Chrome DevTools · Remix (Smart Contracts)
API Testing RESTful APIs · Request/Response Validation · Authentication Testing · Error Handling
Blockchain / Web3 Smart Contract Testing · On-chain Flow Validation · Wallet & DeFi Platform QA
AI Tools Claude · Gemini · Cursor (AI-assisted test planning, debugging & workflow automation)
Frontend / Database React · JavaScript · C# · SQL (Data Validation, Joins, Select Queries)

EXPERIENCE

Software QA Engineer — Quecko Inc.

Islamabad · Aug 2024 – Present

- **JONI — Personal AI Computer (Web & Mobile):** QA Lead across 10+ feature modules. Authored test plans/cases in TestRail (functional, regression, smoke, UI/UX, security); validated multi-step auth and a multi-chain payment system end to end via Postman and manual testing; tested the AI agent marketplace and enterprise dashboard; ensured design fidelity across 50+ screens (Figma vs live), logging UI bugs in Jira with annotated screenshots.
- **Gems Trade — Centralized Crypto Exchange (Web & Mobile):** Designed and executed a comprehensive test strategy across all modules; validated real-time market-data accuracy and multi-step wallet security flows; verified feature parity and UI consistency across 100+ screens.
- **Gems Rocks — Memecoin Launchpad (Web3):** Built and executed a full test suite for token creation and bonding-curve mechanics; performance and load testing; defect tracking in Jira.
- **Flash Wallet — Lightweight Crypto Wallet (Mobile):** Owned the full QA lifecycle; authored the test plan and complete suite; validated all wallet API endpoints via Postman with a security-first approach.
- **Also:** Tasks Platform (Web3, PM + QA Lead, Postman API), Tomi (Web3 Super App, e2e functional/regression/UI/UX + Postman), DOP — Data Ownership Protocol (Postman oracle ingestion APIs), Gems.vip (regression/smoke in TestRail).

Shopify Developer & QA Intern — OptiExperts

New City, Pakistan · Dec 2023 – Feb 2024

- Built an Add-to-Cart feature in JavaScript; performed functional and UI testing via Chrome DevTools.
- Improved performance through script refactoring and minification; worked in Agile sprints tracked in Jira.

EDUCATION

BS Computer Science

University of Engineering and Technology, Taxila
2019 – 2023 · CGPA 3.34 / 4.00

CERTIFICATIONS

- ▶ C# for .NET Developers (Coursera)
- ▶ Programming with JavaScript (Coursera)
- ▶ Introduction to Front-End Development (Coursera)

TESTING PHILOSOPHY

- ▶ **Prevention over detection.** The cheapest bug is the one caught in planning and design, not production.
- ▶ **Coverage you can trust.** Structured plans in TestRail and disciplined defect tracking in Jira, so sign-off means something.
- ▶ **Quality is a team sport.** I embed with developers and designers early and make shipping the right thing the easy thing.
